BUILD TECH
LAMINATED SIDEWALLS

Using processes perfected through years of innovation, our laminated sidewalls combine a light yet resilient welded square-tube aluminum frame and exterior fiberglass with structural, insulating, and decorative layers using advanced heat-resistant adhesives in a vaccum chamber where the layers are bonded into a remarkably light, incredibly strong unit.

THE **AZDEL** ADVANTAGE

Key to LUXURY SERIES vacuum-bonded sidewalls is a structural layer of AZDEL synthetic composite. AZDEL can't absorb moisture, so it won't rot or mildew, and can't delaminate. It insulates against extremes of temperature and noise, contains no formaldehyde, and weighs half as much as the wood it replaces.

1. Gleaming exterior fiberglass
2. AZDEL synthetic composite
3. Rigid closed-cell foam insulation
4. Welded square-tube aluminum skeleton frame
5. Structural plywood inner wall
6. Decorative easy-care vinyl wallcovering
